

Web search API for agents

Exa for People Search

“Exa is necessary for agents on HubSpot to supplement internal data with **high quality, real-time** people and company search. We found that other alternatives were slower, more expensive, and did not have comprehensive enrichment coverage.”

Praty Sharma • AI Lead

Why not just ask the model?

BUILT-IN LLM KNOWLEDGE

EXA

Frozen at the training cutoff

Live web index: current roles, funding, job posts

Reasons about people, can't *enumerate* them

Retrieves actual profiles: name, location, work history

Unsourced answers you can't ship

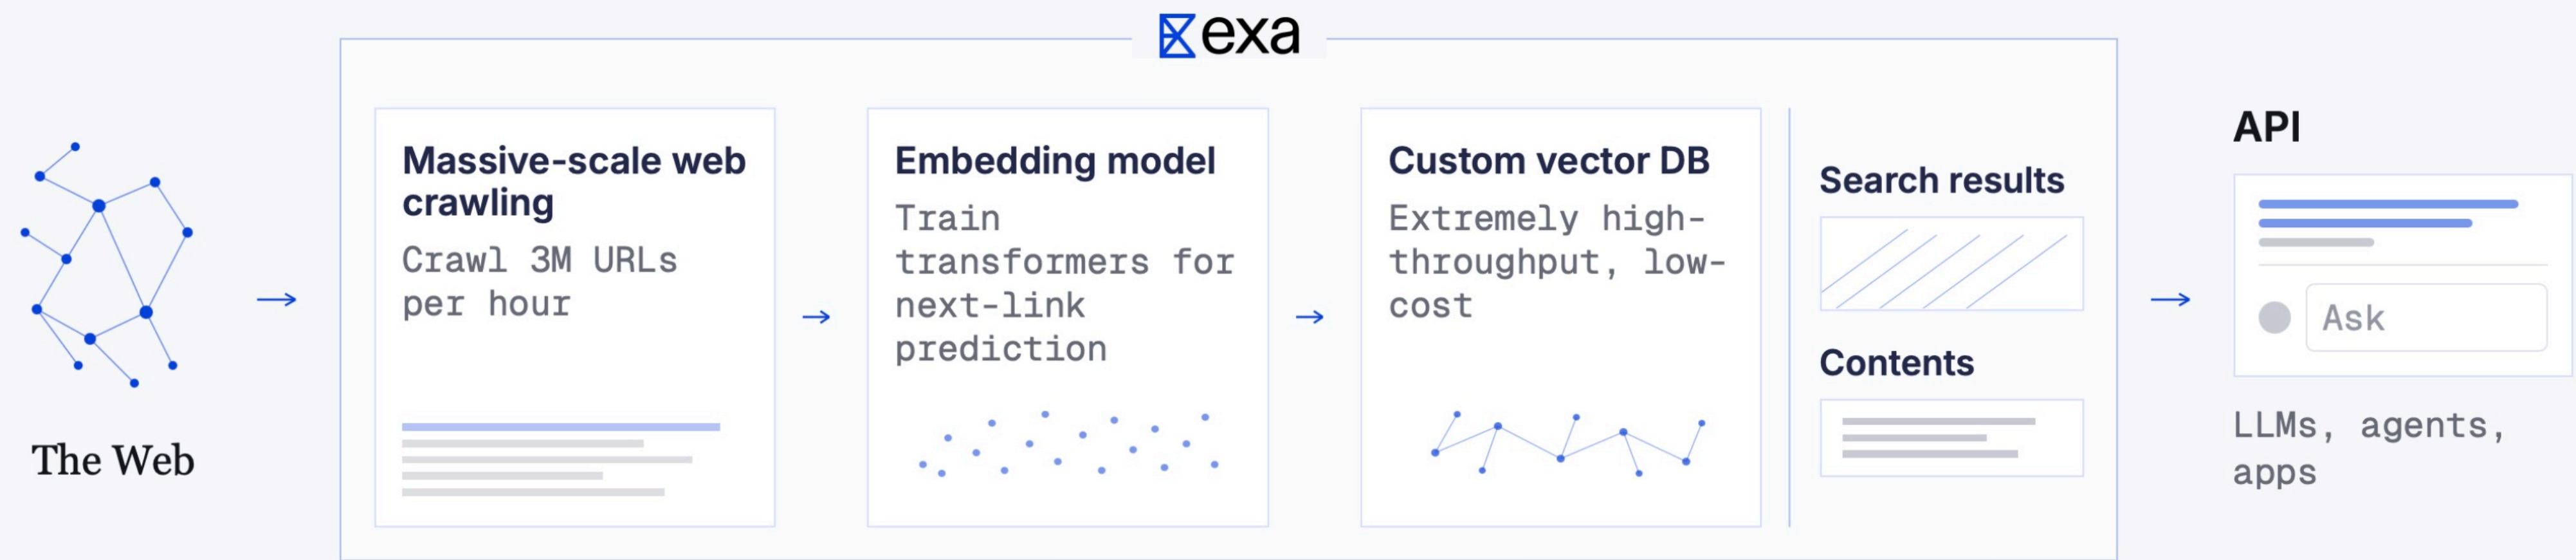

Every result carries a URL: verifiable, token-efficient

USED BY

How Exa works

Low-latency, token-efficient web search
